**Dual PowerTower® Mount**  
For New KVH M3 Satcom and Radar Antennas

Scanstrut Ltd, market leaders in the design and manufacture of installation solutions for marine electronics, are pleased to launch their New Compact Dual PowerTower® Mount at this years London Boat Show.

This addition to the Dual PowerTower® range allows the installation of the new KVH M3 antenna along with all 18" and 24" radar antennas together in a compact, single space saving mount, ensuring maximum performance from both electronics.

Featuring an adjustable radar mounting plate, the Dual PowerTower® allows for variation in radome size, enabling the radar to be positioned as close as possible to the structural centre of gravity, ensuring minimal load is placed on the radar arch.

## Key Features:

- 🌀 Installs satcom antenna above the radar – eliminating antenna interference
- 🌀 Lightweight fabrication – only 8.37 lbs / 3.8 kg
- 🌀 250mm low profile - an ideal installation for smaller power boats
- 🌀 200mm square footprint – minimal mounting area required
- 🌀 Integral cable management system – cables hidden from view
